2. Session on “Why IP is important in academia?”

Dr. Abhay Jere elaborated the importance of intellectual property. He said, the researchers and academicians should convert the knowledge into wealth through innovation, product development, startups, and different ventures.

The theme of intellectual property is extremely important for India. If we want to emerge as five Trillion dollar economy, then we have to strengthen our manufacturing sector that can be only done through our MSMEs. We need to have huge amount of MSMEs, for creation of employment on large scale.

Large number of ideas need to be generated, and ensure that those ideas need to be converted in enterprises. Youngsters need to be motivated to encash on demographic dividend, get out of the mindset of getting only marks, and start looking at ideas, problems which we can solve.

He informed that government has announced Kapila initiative where government expects that higher education institutes to go ahead and file Intellectual property.
